1927 SURPLUS LIST

FOREWORD

This little catalog, now in its fourth edition, constitutes an effort to find outlet for, and especially to secure wider local dissemination of the fast accumulating surplus of one of the largest study collections of Irises on the Pacific Coast. Limited space makes the stock of many varieties listed unduly low, but as the resources of three other large private collections are also available through arrangement with their owners, we are generally able to supply reasonable demand.

As we are constantly acquiring new varieties, and comparing and discarding older ones, the list of varieties available in surplus is constantly changing, and similarly but a certain proportion of the 1000 or more varieties which our collection includes can be offered at any one time. Single roots, however, of many varieties not yet listed can often be supplied, so in case of **specific desiderata unmentioned in this booklet** special inquiry is invited.

Attention is called to the further material reductions in prices in this 1927 list as well as to the many new varieties offered.

The short list of our own seedlings (see page 5) is especially nominated for consideration. The newer introductions offered are very desirable for California gardens, but their behaviour in colder climes has not yet been ascertained in all instances. Our intention is to be as conservative as possible in the naming of seedlings and therefore only one out of our many hundreds is offered as new at the present time. This received the signal honor of H. M. from the American Iris Society and is an exceedingly beautiful flower.

CULTURAL NOTE

The culture of Irises depends mainly upon the particular group or type to which the plants belong. That of the majority of the Pogoniris or bearded group is very simple. Abstention from the use of retentive manure, a fair amount of lime in the soil, and good drainage are the

principle points to attend to. The rhizomes should be set in the earth at time of planting with the roots carefully spread and the soil firmed about them, but the top of the rhizome not quite covered. In Southern California the most successful Iris growers are those who irrigate their plantations occasionally through the summer, perhaps once a month like a citrus orchard, following each watering with a light cultivation.

Ridging the beds or planting on a slope is often resorted to with notable success.

Apogon Irises require somewhat more moisture and humus in the soil as a rule, and for some groups, notably *Oncocyclus* and *Regelia*, quite special treatment is demanded—lighter soil, extra care in drainage, abundance of lime, and **no water** in summer.

Most of the *Evansias* prefer considerable shade and are among the few Irises which do their best under such conditions.

For immediate garden effect we strongly recommend planting in groups of 3 or 5 rhizomes of a kind. Such a number may often be supplied at an appreciable reduction from the regular per unit price.

Cash with order or references.

Fulfillment of all orders subject to stock on hand.

Prices are for strong, single rhizomes. The Iris borer has not yet come into our garden and every care is taken to keep stock as free as possible of rot and other troubles.

Where stock permits, twelve roots of a variety will be supplied for the price of ten.

We offer no guarantee except to do our best, but should stock sent prove untrue to name, every effort will be made to replace same satisfactorily.

Orders to value of \$5 or over sent prepaid to any part of U. S.

Orders for plants other than novelties to a total value of \$10 or over are privileged to a

selection of extra plants to the value of 10% of the order.

Where customer includes allowance for postage with order, extra plants will be sent to cover same.

OUR OWN INTRODUCTIONS

JACINTO (1924). S. Light Lobelia Violet, F. Ageratum Violet; flower of fair size and attractive symmetry; 4 ft. stem, well branched; a tall pale blend of neutral tone with a pinkish cast; soft colorings, often seen on the beautiful mountain whose name it shares; present reports seem to indicate this to be reasonably hardy in the north. \$3.00.

***ORIZABA (1925).** S. Pleroma Violet, F. Hyacinth Violet, deepening to Mulberry Purple; conspicuous yellow beard; a huge and handsome dark purple Iris of Mesopotamica habit; 4 ft.; very early; coloring remarkably clear and deep; hardiness quite untested; illustrated on back cover. \$8.00.

CACIQUE (1925). H. M., A. I. S. Handsome, upstanding fulva hybrid, in Prune-Purple and Blackish-Purple, on the order of the well-known Dorothea K. Williamson, but with us taller and a more robust grower; warmer but less brilliant coloring; brilliant gold arrow on falls. We at last have enough stock to bring this splendid Iris appreciably lower in price. \$3.50.

***CANYON MISTS (1926).** A very light mauve self, quite similar in color effect to Mlle. Schwartz, but has a longer season and does not fade out seriously in bright sun. With us it is a more satisfactory grower and more floriferous than Mother-of-Pearl. A seedling of Caterina and very effective in mass where pale coloring is desired. Especially recommended for gardens where Mlle. Schwartz proves unsatisfactory. 3 to 3½ ft. \$4.00.

***MAUNA LOA (1926).** H. M., A. I. S. "Seedling 181". A tall upstanding bicolor of a

strong reddish cast, the rich Dahlia Purple falls giving the dominant color note. Very large flowers. For so big and tall an Iris it seems to stand up amazingly well in rough weather. This has been one of the most admired Irises in our entire garden, and all stock available for 1926 delivery was sold. Only a little more is available for sale the present season. Price of strong single rhizomes for fall delivery 1927 \$15.00 each; for delivery in spring of 1928 \$12.50 each.

***OSPREY (1927).** H. M., A. I. S. This is the "Seedling 300" which found so many admirers at the recent Pasadena and Redlands flower shows, and which was subsequently illustrated in the Los Angeles Times. It is an immense spreading pale lavender flower with a touch of yellow at the throat, somewhat between **Souvenir de Loetitia Michaud** and **Mother-of-Pearl** in effect; shape and texture unusually fine, the one fault we have noted being a slight fading of the delicate coloring under hot sun. It is a magnificent exhibition Iris; height 3 ft. A splendid grower, but stock is still very limited and only 6 rhizomes are offered for fall delivery. \$20.00.

SPECIAL SET

A set of one each of the following recent introductions and novelties will be sent prepaid for \$28.50. Orizaba, Jacinto, Cacique, Canyon Mists, Mauna Loa.

WILD TYPES OF POGONIRIS

We are especially interested in the wild forms of Iris and have a considerable collection of which the following of the bearded Irises are now available in more or less surplus. They are particularly interesting to those concerned in breeding work or botanically inclined, but most are likewise fine garden plants.

Albicans. Lovely early flowering white Iris, indispensable in California where it is often

- in full flower in February and usually lasts till Easter. 25c; 5 for \$1.00; 15.00 per 100.
- Amas.** A huge broad-petaled *germanica* from Asia Minor. 35c.
- Biliotti.** A rather low growing dark blue-purple Iris from Asia Minor. \$1.00.
- Cengialti.** Small, but very floriferous lavender Iris from northern Italy; exquisite when massed. 35c.
- Como.** A beautiful *pallida* from northern Italy. \$1.50.
- Cretan.** A collected form from Mr. Dykes; related to *Kochii* and *Crimson King*, but somewhat bluer. An exceedingly brilliant piece of color. \$3.50.

- Istria.** A very cool looking white with a distinct hint of green. It was collected by the late Mr. W. R. Dykes near Fiume. \$5.00.
- Kharput.** A good collected form of *germanica* from Asia Minor. A question has arisen as to whether our stock under this name is true. It is therefore temporarily withdrawn.
- Kochii.** Similar to but bluer than *Crimson King*. 25c.
- Madonna.** Supposed to be the blue-purple form of *albicans*, but does not behave much like it in the garden. \$1.00.
- MESOPOTAMICA.** An enormous blue-purple Iris of Asiatic origin, which is an impressive garden subject in California and as a breeder has yielded some of the finest hybrids in cultivation, 75c each; 3 for \$2.00.
- Nepalensis.** A deep blackish-purple form of *Kochii*. 35c.
- Pallida.** Tall light lavender. 25c.
- Pallida Dalmatica.** Similar to preceding, but larger flowers and deeper in color. 35c.
- Ricardi.** A variant early form of *Mesopotamica*. \$5.00.

- Mesopotamica b.** A larger flowered form with sinuous stems. \$1.50.
- Syracuse.** A handsome large-flowered form of albicans collected by Sir Arthur Hort in Sicily. \$7.50.

- Variegata.** A strong growing wild form of the true species from Sir Michael Foster's garden, originally no doubt from southeastern Europe. \$3.50.

POGONIRIS—GARDEN VARIETIES

Duly allowing for personal preferences and special conditions, we have found all the varieties offered in the present list which we have had long enough for fair testing to be worth growing.

Varieties having the names printed in capitals are in a way specialties of ours, and of these we have developed a particularly fine stock. These are all highly recommended.

1927 DISCARDS

The following Irises have been rejected from our garden and will no longer be offered. Record of their departure seems worth while, although we are fully conscious that our grounds for criticism may not apply with equal force in other localities. However, we recommend none of them.

Bridesmaid. A pretty little plicata in a group in which competition is becoming increasingly keen.

Catalina (Dean). Not sufficiently distinctive.

Conrade (Hort). In no way outstanding.

Cretonne (Bliss). Thoroughly unsatisfactory under our conditions.

Diane (Vilmorin). Neither sufficiently floriferous nor distinctive.

Foster's Yellow (Foster). Entirely outclassed by newer yellows.

Hermosa (Dean). Unsatisfactory grower and rather lacking in quality.

Ivanhoe (Millet). Ordinary.

Lewis Trowbridge (Farr). Not sufficiently distinct.

Margaret Moor (Bliss). Better are available in similar color.

- Merlin (Sturt.).** Unsatisfactory grower with us and in heavy competition otherwise.
- Mrs. Cowley (Bliss).** Weak grower.
- Mrs. Tinley (Bliss).** Too many of this type and this one not of the first rank in our garden.
- Nelson (Bliss).** A very good pallida but too similar to others.
- Onnoris (Sturt.).** A pretty yellowish plicata but now quite outclassed.
- Orchid (Shull).** Growth unsatisfactory.
- Patience (Foster).** Never of interest save for its lateness and we now have some that flower later still.
- Pensamiento (Shull).** Growth unsatisfactory and shy of bloom; foliage poor.
- Phyllis Bliss (Bliss).** Weak grower and in any case superseded.
- Prestige. (Sturt.).** Dwarf and poor grower.
- Raffet (Vilm).** Ordinary.
- Red Cloud (Farr).** Outclassed completely by several others.
- Rotorua (Bliss).** Poor grower and probably outclassed as well.
- Sherwin Wright.** Dwarf, poor foliage and a weak grower with us; color its one good point.
- Sybil.** Pretty coloring, and discarded by an error, but hardly worthy of replacement.
- Thelma Perry (Perry).** Not sufficiently outstanding.
- Trianon (Vilm.).** Poorly formed flower and weak grower.
- Tunisie (Mil.).** Ordinary.
- Undine (Koehler).** Not sufficiently distinctive.
- Ursula (Hort).** Too many of same type.
